<b>UNITED STATES</b>	205,815,000	156,421,311	76	105,586,274	67.5	51.3

**2000 VAP** refers to the total Voting Age Population of the State as reported by the Bureau of Census. Please note that the VAP includes all persons over the age of 18 -- including a significant number of people not eligible to vote in U.S. elections.

**2000 REG** refers to the total number of registered voters as reported by the States.

**TURNOUT** in this instance refers to the total vote cast for the highest office on the ballot in **2000** (President). These figures may be inconsistent with other reported figures shown on this site and elsewhere since research suggests that approximately 2% of voters fail to vote for the highest office

on a fairly consistent basis.

**North Dakota** has no voter registration.

**Wisconsin** has election day registration at the polls.

**Registration and turnout statistics courtesy of State election offices.**
